Dear Hiring Manager,

I am a Software Engineer with over 18 years of experience working with web applications, mobile and ERP systems. I am proficient working on the backend, frontend, mobile, operational system, database, network, and cloud.

In my previous job here in Australia at Pivotal Agency, I made advanced features using Laravel. Some of them I feel proud of were setting up the Stripe payments for reserving a car on car4us.com.au website, extensive external and internal API integrations and advanced features like Queues, Task Scheduling, Events, Notifications and so on.

At RecruitOnline, as a Recruitment software, I can point a big development on the candidates portal where I changed the legacy website to a bootstrap responsive/mobile friendly new website and created new features like job search, saved jobs and others as well as the whole API integrations with FlareHr, Leedsafe, Seek, Indeed, Xero and others.

I had to quit my previous job in Australia, because of a personal issue. I went to Brazil in March 2024 and came back in the end of October 2024. It has been hard to find an IT job again as a student. It is the first time in 18 years that I have a gap on my resume. I believe in my potential and I know that I can get a job even with my restrictions. I live on Gold Coast and there does not have many IT jobs around and I am keen to move to anywhere in Australia if necessary.

Sincerely,  
Andre Floquet
